

GreenMatter ReLife® FitFlex rubber tile

The GreenMatter ReLife® FitFlex rubber tile provides a safe and comfortable surface for outdoor workouts. These outdoor fitness mats offer optimal cushioning and grip, preventing injuries. Available in two sizes, the 30mm tile provides a cushioning subfloor during light workouts, while the 43mm is specifically designed to provide a safe and durable surface during intense and frequent outdoor workouts. Both fitness mats are highly resistant to moisture, sunlight and frost. Due to the padded structure on the bottom, rainwater is quickly drained and puddle formation is prevented.

With the GreenMatter ReLife® FitFlex rubber tile, the rubber from artificial grass pitches is given a third life because this infill rubber consists of 100% recycled rubber granulate that was extracted from worn vehicle tyres. An exceptionally sustainable solution!

A glance of the advantages

- Shock absorption
- Sound reduction
- Anti-slip
- Hard-wearing
- 100% recyclable

Technical specifications

1000 x 1000 x 30 mm	24 kg
1000 x 1000 x 43 mm	24 kg
Dimension variance	Length en Width +/- 1.5% , Thickness +/-8%
Weight variance	+/- 5%
Material composition	Recycled rubber granulate bonded with PU binder
Surface structure	Top side flat, bottom side traction pad structure.
Colour	Black
REACH	According to entry 50 Annex xvii of the REACH Regulation, to be applied in situations where frequent skin contact is possible or as a surface on which children play regularly.
